

Redbank Plains SES Depot

SES Depot Construction and Fit Out

CLIENT:	ICD Group
LOCATION:	Redbank Plains, QLD
PROJECT VALUE:	\$115,230.00
CONTRACT PERIOD:	15 Weeks
COMPLETION DATE:	June 2013

PROJECT DESCRIPTION

The team at Electrical Data and Security Services (EDSS) has recently completed our role in the construction and fit out of the new SES Depot located off Willow Road in Redbank Plains. Previously located at Jones Road Goodna, the State Emergency Services had outgrown the old building proving its size, layout and quality were inadequate for their functionality needs.

The new building, constructed at the south eastern end of Redbank Plains Recreational Reserve, saw us working closely with Intergrated Construction & Development Group, to complete this project within the 15 week contract period.

EDSS completed the installation of all lighting, power, fire detection and communications work on the building, both internally and externally. This included the erection and fit-off of the external car park lighting poles, the supply and installation of the main switchboard and master panel as well as a provision for a future generator.
